

## Take control of your bills

Get started with these saving tips

We want to help you save. A few small steps could add up to big savings.

**Weatherize your home** – Sealing air leaks around windows, doors, and vents will help save energy and make your home more comfortable.

**Smart controllers** – Smart thermostats, smart appliances, and smart irrigation controllers all use technology to help you save.

**Look for EPA labels** – When buying appliances, water heaters, electronics, light bulbs, toilets, faucets, showerheads, and more, look for ENERGY STAR® and WaterSense labels. Items with these labels are certified by the EPA to use less and can save you significant money on your utility bills.

**Rebates** – Let us pay you to conserve energy and lower your energy bills. Customers may qualify for rebates to buy ENERGY STAR® rated natural gas appliances.
